TRAIN THE TRAINER MODULE

and

TRAINER OBSERVATION CHECKLIST

Certification, Delivery Standards, and Quality Assurance for Training Delivery

Version 4.0 | Confidential — Internal Use Only

PLATFORM STANDARD

ConnectTeams is the current operating platform for all training records, certification records, and session logging. All references to system logging within this module must be completed using ConnectTeams until further notice. This module will be updated upon the launch of Eagle IO.

1. Purpose and Scope

This module exists to solve one problem: ensuring that the FacilityPro Academy Intermediate Training Programme produces identical results regardless of who delivers it.

The v4 Training Manual defines what to teach. This module defines how to teach it, who is qualified to teach it, and how training delivery quality is measured and maintained.

PRINCIPLE

A training programme is only as strong as its weakest trainer. If two trainers deliver the same Phase and produce different outcomes, the system has failed — not the trainee. This module ensures that cannot happen.

Who This Module Is For

- Training Supervisors responsible for certifying new trainers
- Experienced crew members being developed into training roles
- Operations managers who need to audit training quality
- Anyone who will deliver any part of the FacilityPro Academy programme

What This Module Covers

Section	Content
1. Purpose and Scope	Why this module exists and who it is for
2. Trainer Prerequisites	What a trainer must already know and demonstrate before certification
3. Trainer Certification Process	The step-by-step process for certifying a new trainer
4. Session Delivery Standards	The non-negotiable standards for how every training session is delivered
5. Exercise Setup and Scoring	How to prepare, run, and score every exercise consistently
6. Assessment and Remediation	How to assess trainees and handle failures consistently
7. Trainer Observation Checklist	The checklist used to audit and score trainer delivery quality
8. Trainer Certification Record	The sign-off document for certified trainers

2. Trainer Prerequisites

Before entering the trainer certification process, a candidate must meet all of the following prerequisites. These are not negotiable — a trainer who has not met these requirements will produce inconsistent results.

Mandatory Prerequisites

☐	Completed the full FacilityPro Academy Intermediate Programme (all 7 Phases) with certification
☐	Passed the final written knowledge check at 90% or above (not 80% — trainers are held to a higher standard)
☐	Minimum 3 months of active crew operations after certification
☐	Completed at least 10 jobs as Crew Lead with satisfactory supervisor evaluations
☐	Demonstrated the Train-by-Show method on at least 2 new starters with documented outcomes
☐	No active disciplinary issues or performance concerns
☐	Nominated by their Crew Supervisor or Operations Manager

STANDARD

A trainer must be a better operative than the people they are training. If a candidate cannot consistently execute every SOP in this programme to the DVG Excellence Standard, they are not ready to train others — regardless of their communication skills or seniority.

3. Trainer Certification Process

Trainer certification is a structured, assessed process — not a promotion or a title. It requires observed delivery, scored performance, and formal sign-off.

The 4-Step Certification Process

Step 1: Manual Mastery Review

Duration: 1 session (3 hours)

- The candidate completes a full review of the v4 Training Manual with the Training Supervisor
- The supervisor tests the candidate on: every stage transition callout (verbatim), every assessment criterion across all 7 Phases, the remediation protocol, and the exercise setup requirements for every exercise
- The candidate must demonstrate that they can locate any procedure in the manual within 30 seconds
- **Pass standard:** 100% accuracy on callouts and assessment criteria. No errors permitted — a trainer who teaches incorrect procedures creates systemic damage.

Step 2: Observed Session Delivery

Duration: 2 sessions (6 hours total)

- The candidate delivers two complete training sessions to real trainees, with the Training Supervisor present as a silent observer
- Session 1: The candidate delivers a Phase 1 or Phase 2 session (foundational content)
- Session 2: The candidate delivers a Phase 3, 4, or 5 session (applied skills content)
- The Training Supervisor scores each session using the Trainer Observation Checklist (Section 7)
- **Pass standard:** Score of 80% or above on the Trainer Observation Checklist for both sessions. Any item marked ‘Not Demonstrated’ in the Non-Negotiable section is an automatic fail.

SESSION REQUIREMENT

Both observed sessions must be delivered to real trainees. These may be the same cohort or different trainee groups, provided both sessions are fully delivered and independently assessed.

Step 3: Exercise Setup and Scoring Audit

Duration: 1 session (3 hours)

- The candidate sets up and runs every exercise from the two Phases they delivered in Step 2
- The Training Supervisor checks: correct fault placement (Exercise 1A, 5A), correct scenario cards (Exercises 4A, 6A, 7C), correct scoring against pass standards, and correct application of the remediation protocol for a simulated failed assessment

- **Pass standard:** All exercises set up correctly, scored correctly, and remediation protocol applied correctly. Errors in scoring or pass standards are automatic fails — inconsistent assessment is the fastest way to degrade the programme.

Step 4: Certification Sign-Off

- The Training Supervisor completes the Trainer Certification Record (Section 8)
- The candidate receives a signed copy and is added to the Certified Trainers register in ConnectTeams
- The candidate is authorised to deliver the FacilityPro Academy programme independently
- Certification is reviewed every 24 months — the Training Supervisor conducts one observation every 24 months using the Trainer Observation Checklist

RECERTIFICATION

Trainer certification is not permanent. If a trainer's observation score falls below 80% during recertification or scheduled review, or if trainee outcomes decline (measured by Phase assessment pass rates), the trainer enters a remediation process: one coaching session with the Training Supervisor followed by a re-observation. If the re-observation also fails, certification is suspended until the trainer completes the full certification process again.

4. Session Delivery Standards

Every training session delivered under the FacilityPro Academy programme must meet the following standards. These are the minimum — not the target.

Before the Session

☐	**DO:** Review the relevant Phase in the v4 Training Manual — do not deliver from memory
☐	**DO:** Prepare all exercise materials (fault lists, scenario cards, scoring sheets) before trainees arrive
☐	**DO:** Confirm the training space is clean, equipped, and set up for the exercises in this Phase
☐	**DO:** Have printed copies of the relevant checklists and assessment criteria for each trainee
☐	**DO:** Prepare the Reinforcement Card for this session — three procedures, self-check questions, and observation task
☐	**VERIFY:** All equipment required for exercises is present and functional
☐	**VERIFY:** You can deliver every callout, script, and procedure in this Phase verbatim

During the Session

- **Follow the manual sequence exactly.** Do not reorder content, skip sections, or merge Phases. The sequence exists for a reason — each Phase builds on the previous one.
- **Narrate the 'why' behind every procedure.** Trainees who understand the reason retain the procedure. Trainees who are told 'just do it this way' forget within days.
- **Demonstrate before asking trainees to execute.** Use the Train-by-Show method for every practical task: I do/you watch → I do/you help → you do/I watch → you do/I check → you do/you check.
- **Run every exercise at full duration.** Do not compress exercises to save time. If a session is running long, extend it — do not cut the exercise.
- **Debrief every exercise.** Every exercise ends with a structured debrief: what went well, what needs improvement, and what the specific standard is. Do not skip the debrief.
- **Teach the SOP as written.** Do not teach your own shortcuts, preferences, or variations. The manual is the standard. Your personal method may be effective, but it is not the system.

After the Session

☐	**DO:** Complete the assessment criteria for this Phase — record pass or fail for each item
☐	**DO:** Issue the Reinforcement Card to each trainee
☐	**DO:** Record any failed criteria in the Programme Completion Record with specific notes
☐	**DO:** Apply the remediation protocol for any trainee who did not meet the pass standard
☐	**DO:** Log the session in ConnectTeams — date, Phase delivered, trainees present, assessment outcomes
☐	**VERIFY:** Every trainee has received their Reinforcement Card and understands the observation task
☐	**VERIFY:** All exercise materials are reset and stored for the next session

DELIVERY RULE

The trainer's job is not to make the session interesting. It is to make the trainee competent. Every minute of a session must move a trainee closer to passing the assessment criteria for that Phase. If a trainee leaves a session unable to do something they could not do before, the session has failed.

5. Exercise Setup and Scoring Standards

Every exercise in the programme has a setup guide in the v4 Training Manual (in the TRAINER SETUP boxes). This section provides the overarching standards that apply to all exercises.

Setup Standards

- All exercise materials must be prepared before trainees arrive — never set up during the session
- Fault placement exercises (1A, 5A): record the exact faults and locations on a master sheet before the exercise begins. The same fault list must not be reused for consecutive groups — rotate from the approved fault list
- Scenario card exercises (4A, 6A, 7C): use the exact scenarios from the trainer setup boxes in the manual. Do not create your own scenarios — consistency requires standardised inputs
- Simulation exercises (2B, 3A, 3B, 4B, 5B, 7A): prepare the training space to match the simulation requirements. The space must be realistic enough that the trainee treats it as a client site

Scoring Standards

- **Score against the published criteria only.** Do not adjust pass standards based on the trainee's experience level, attitude, or effort. The standard is the standard.
- **Record specific observations, not general impressions.** 'Needs improvement' is not acceptable feedback. 'Missed the dwell time on the second kitchen counter and wiped 15 seconds early' is.
- **Score immediately after the exercise.** Do not batch scoring at the end of the session. Memory degrades within minutes — score while the observation is fresh.
- **Never change a score after the debrief.** If the trainee demonstrates the correct technique during the debrief discussion, that does not retroactively pass them on the exercise. They must be re-assessed.

SCORING RULE

If two trainers observe the same exercise and produce different scores, the exercise setup or the scoring criteria are ambiguous. Report this to the Training Supervisor immediately so the criteria can be clarified for all trainers.

6. Assessment and Remediation Standards

The remediation protocol is defined in the v4 Training Manual (How to Use This Manual section). This section provides additional guidance for trainers on how to apply it consistently.

When a Trainee Fails

- Identify the specific criteria not met — not the general area. ‘Failed Phase 3’ is not actionable. ‘Could not execute opposite-direction technique without prompting’ is.
- Record the failed criteria in the Programme Completion Record with the date and your specific observation notes
- Schedule targeted coaching on the failed criteria — minimum 30 minutes of focused practice in the next session
- Re-assess on the failed criteria only — not the entire Phase
- If the same criteria fail twice, escalate to the Training Supervisor before a third attempt — the issue may be in the delivery, not the trainee

Common Trainer Errors in Assessment

Error	Why It Happens	Correct Approach
Passing a trainee who is ‘close enough’	Time pressure, wanting to keep the group together	The pass standard is binary. Close is not a pass. Re-assess.
Failing the whole Phase instead of specific criteria	Easier to say ‘redo Phase 3’ than identify the gap	Identify the exact failed criteria. Coach those. Re-assess those only.
Adjusting the standard for a struggling trainee	Empathy for the trainee’s effort	The standard protects the client. Lowering it creates a quality gap on site.
Not recording failures	Uncomfortable conversation, paperwork avoidance	Undocumented failures become invisible. Record every one.
Blaming the trainee without checking delivery	Assumption that the teaching was clear	If multiple trainees fail the same criteria, the delivery may need adjustment.

7. Trainer Observation Checklist

This checklist is used by the Training Supervisor to observe and score a trainer's delivery of any training session. It is used during the certification process (Step 2) and for annual recertification observations.

Trainer Name:	
Observer:	
Date:	
Phase Being Delivered:	
Session Number:	
Trainees Present:	

Section A: Session Preparation (Non-Negotiable)

All items in this section must be marked 'Yes' to pass. Any 'No' is an automatic fail.

Item	Yes	No	Notes
Trainer reviewed the relevant Phase before the session			
All exercise materials prepared before trainees arrived			
Training space clean, equipped, and correctly set up			
Printed checklists and assessment criteria available for trainees			
Reinforcement Card prepared for this session			
Trainer can deliver all callouts and procedures verbatim			

Section B: Content Delivery (Scored)

Score each item: 3 = Fully demonstrated, 2 = Partially demonstrated, 0 = Not demonstrated

Item	Score (1-3)	Notes
Followed the manual sequence exactly — no reordering or skipping		
Explained the 'why' behind each procedure, not just the 'what'		
Used the Train-by-Show method for practical demonstrations		
Narrated each step clearly during demonstrations		
Taught the SOP as written — no personal shortcuts or variations		
Checked trainee understanding before moving to next		

topic		
Used the correct terminology from the v4 manual (Stages not Phases for execution, etc.)		
Maintained appropriate pace — not rushing, not dragging		

Section C: Exercise Delivery (Scored)

Item	Score (1-3)	Notes
Exercises set up correctly per the TRAINER SETUP guide in the manual		
Exercises run at full duration — not compressed		
Trainee performance observed and recorded during exercises		
Scoring completed immediately after each exercise		
Structured debrief delivered after every exercise		
Specific feedback given — not general impressions		

Section D: Assessment and Follow-Up (Scored)

Item	Score (1-3)	Notes
Assessment criteria applied correctly — scored against published standards		
Failed criteria identified specifically — not generalised		
Remediation protocol applied correctly for any failures		
Programme Completion Record updated with accurate notes		
Reinforcement Card issued to every trainee at end of session		
Session logged in ConnectTeams with correct details		

Section E: Professional Standards (Scored)

Item	Score (1-3)	Notes
Trainer demonstrated respect and patience with all trainees		
Trainer maintained authority without being dismissive or condescending		
Trainer answered trainee questions accurately and completely		
Trainer redirected off-topic discussion without losing engagement		

Scoring Summary

Section	Max Score	Score Achieved
A: Session Preparation	All Yes = Pass / Any No = Fail	
B: Content Delivery (8 items × 3)	24	
C: Exercise Delivery (6 items × 3)	18	
D: Assessment and Follow-Up (6 items × 3)	18	
E: Professional Standards (4 items × 3)	12	
TOTAL (B + C + D + E)	**72**	
PASS MARK (80%)	**58**	

PASS CRITERIA

To pass the Trainer Observation: (1) Section A must be all ‘Yes’ — any ‘No’ is an automatic fail regardless of the scored sections. (2) Sections B through E combined score must be 58 or above (80% of 72). (3) No single scored item may be marked ‘0 — Not Demonstrated’ in Sections B or C — content and exercise delivery must be at least partially demonstrated on every item.

DEVELOPMENT CONDITION

If a trainer achieves a passing score (≥80%) but demonstrates weaknesses in specific areas, the Training Supervisor may assign mandatory development actions. These actions must be completed before the trainer delivers that Phase independently. Failure to complete development actions may result in temporary restriction of training scope.

Overall Result (Pass / Fail):	
Observer Comments:	
Key Strengths:	
Areas for Development:	
Observer Signature:	
Date:	

8. Trainer Certification Record

This record is completed by the Training Supervisor upon successful completion of all four certification steps. A signed copy is retained by the trainer and a copy is stored in ConnectTeams.

Trainer Name:	
ConnectTeams ID:	
Certification Date:	
Certifying Supervisor:	

Certification Step	Date Completed	Supervisor Sign-Off	Notes
Step 1 — Manual Mastery Review			
Step 2 — Observed Session Delivery (Session 1)			
Step 2 — Observed Session Delivery (Session 2)			
Step 3 — Exercise Setup and Scoring Audit			
TRAINER CERTIFIED			

Observation Checklist Scores	Session 1	Session 2
Section A: Preparation (Pass/Fail)		
Section B: Content Delivery (/24)		
Section C: Exercise Delivery (/18)		
Section D: Assessment and Follow-Up (/18)		
Section E: Professional Standards (/12)		
Total (/72)		
Result (Pass/Fail)		

Annual Recertification Schedule

Year	Observation Date	Score	Result	Observer
Year 1				
Year 2				
Year 3				
Year 4				
Year 5				

CERTIFICATION VALIDITY

Trainer certification is valid for 24 months from the date of certification or last successful observation. The Operations Manager is responsible for scheduling recertification observations before the 24-month expiry date. If a recertification observation is not completed within the 24-month window, certification lapses automatically. A lapsed trainer must complete the full certification process again before resuming training duties.
